Philadelphia | PA | 570.691.8957

Frontend web developer from Philadelphia leveraging a strong customer service background to create user friendly web applications. Seeking to continually build my knowledge of the field by completing a rigorous 24-week Full Stack coding bootcamp through the University of Pennsylvania. Skilled in Javascript, React, Node.js, HTML, & CSS as well as in project communication. Adept at learning new skills independently, but also someone who thrives on collaborative development in a team environment.

TECHNICAL SKILLS

Frontend: React, JavaScript, jQuery, REST API, CSS3, CSS Animations, HTML5

Backend: MySQL, MongoDB, GraphQL Node.js, Express

ECommerce: Shopify

Cloud Server: Heroku

Version Control: Git, GitHub

Digital Marketing: SEO, Google Analytics

PROJECTS

D&D Character Building MERN Stack App | [GitHub Repo](#) | [Deployed App](#)

- Lets users sign up/in and create characters that can be edited or deleted
- Renders front-end UI via React
- Built with MongoDB and uses Mongoose and GraphQL to handle CRUD actions
- Styled CSS with Bootstrap framework

WEATHER APP | [GitHub Repo](#) | [Deployed App](#)

- Uses OpenWeather API to display current weather info based on any city
- Provides data to users within a clean and responsive UI
- Created a quick search tab for new searches

DAILY SCHEDULE APP | [GitHub Repo](#) | [Deployed App](#)

- Uses local storage to create and save daily tasks
- Incorporates dynamic color coding based current time of day
- Styled with CSS framework to create an easy to navigate UI
