1613 E. Berks St. Philadelphia | PA | 19125 | 570.691.8957

Front-end web developer from Philadelphia leveraging a strong customer service background to create user friendly applications. I seek to continually build my knowledge of the field by completing the UPenn Coding Bootcamp and updating my projects on GitHub in order to learn up to date technology. Adept at learning new skills independently, but also someone who thrives on collaborative development in a team environment.

EDUCATION: UPENN, LPS Coding Bootcamp, Philadelphia, PA

Full-Stack Web Developer Certification: August 2021

MERN Stack

TEMPLE UNIVERSITY, Fox School of Business, Philadelphia, PA

Bachelor of Business Administration, Graduation: May 2015

Major: Marketing

SKILLS:

- MongoDB, GraphQL, NodeJS
- JavaScript, CSS3, HTML5
- Git, GitHub, Heroku
- Digital Marketing
- Hospitality & Customer Service

WEB DEV PROJECTS:

D&D CHARACTER BUILDING APP

- Lets users sign up/in and create characters that can be edited or deleted
- Renders front-end UI via React
- Built with MongoDB and uses Mongoose and GraphQL to handle CRUD actions
- Styled CSS with Bootstrap framework

WEATHER APP

- Uses OpenWeather API to display current weather info based on any city
- Provides data to users within a clean and responsive UI
- Created a quick search tab for new searches

DAILY SCHEDULE APP

- Uses local storage to create and save daily tasks
- Incorporates dynamic color coding based current time of day
- Styled with CSS framework to create an easy to navigate UI

WORK:

EL CAMINO REAL, Philadelphia PA

Feb. 2017-March 2020

BARTENDER & SERVER

- Maintained professional level of hospitality for both new and returning customers
- Executed high sales numbers during off season and peak season shifts
- Created new drink items for bar specials throughout the year
